Recommendation Letter

This letter is to acknowledge the work of an organization called "NAVEGADORES", headed by Mr. Piotr Wikarek, which was accomplished in October 2010 in Alemtena Catholic Church Mission, Ethiopia.

The above mentioned group donated and installed the following:

1. SQFlex 2.5.2 Grundfos water pump, which powered by solar energy (18 panels of 80 watt each) provides the mission and its activities/beneficiaries with potable water pumped from borehole of total depth 102 m.
2. Solar panels, batteries, charge regulator, cables and accessories, which provide the Alemtena Church Clinic with solar energy for the vaccine refrigerator, microscope, centrifuge, one computer and light in the clinic. After the installation of the above, the clinic can freely give services to the sick and pregnant mothers in spite of frequent cuts in electric power.
3. Solar panels, batteries, inverter charger, charge regulator, cables and accessories, which provide the mission house with solar energy for light and one refrigerator.

All the above brought about a remarkable change in the life and work of the mission's personnel and gave the beneficiaries of the Alemtena Mission access to a better quality services.

Members of "NAVEGADORES" organized also art and sport activities with the children from the Mission Kindergarten and Grade 1 students. Sharing life and crossing the distance allowed the children to experience what each child longs for... love, care and attention.

We are very grateful to "NAVEGADORES" for the donation received and sincerely appreciate the way the project implementation took place. We do believe that both sides (the implementer and the beneficiary) became both givers and receivers, both were enriched, both crossed the distance and met in the common area of sharing life with each other.

We do recommend "Navegadores" to any private person or group who wishes to share their life with the less privileged ones.
